

NYSE Data Project Presentation

Student: Sajjad Ahmadi

What are some similarities and differences between the total revenue of Energy and Consumer Staples sectors in four years?

According to the summary statistics in next page, both sectors have a high standard deviation. Both have a mean that is bigger than their median, and according to this information and their distributions, we can say that the total revenue of both sectors is skewed to the right. But there is a slight difference in the amount of total revenue of both sectors. We can see that based on the summary statistics and the chart on the next page, the consumer staples sector has more total revenue than the Energy sector, and the consumer staples sector keeps the total revenue of itself approximately at the same level in the four years. But the total revenue of Energy sector slightly decreased over the four years.

What are some similarities and differences between the total revenue of Energy and Consumer Staples sectors in four years?

Consumer Staples sector Summary Statistics	
Mean	\$43,407,926,144
Median	\$13,859,500,000
Mode	#N/A
Standard Deviation	\$85,488,778,871
Minimum	\$1,514,000
Maximum	\$485,651,000,000
Range	\$485,649,486,000

Energy sector Summary Statistics	
Mean	\$38,984,796,516.13
Median	\$11,777,257,500.00
Mode	#N/A
Standard Deviation	\$79,864,818,249.62
Minimum	\$1,181,704,000.00
Maximum	\$451,509,000,000.00
Range	\$450,327,296,000.00
